NURSE CALLING SYSTEM

- ▶ BEDSIDE NURSE CALL POINTS
- ▶ NURSE STATION DISPLAY PANEL
- ▶ ROOM CORRIDOR INDICATOR PANEL

We have smart and effective Nurse Calling System which increases better quality of service by ensuring a positive response from the Nurse Station when called by a patient. This system provides efficient management of the Nurse Station display panel with different color for different type of calls.

- » Different calling options with different color indicator and sound.
- » Any patient call is REMEMBERED until the patient is attended to.
- » Different type of display option for better visibility at Nurse Station.
- » Glass finishes Multicolor Door and Bed indicators help status.
- » Low working voltage to ensure patient's safety.

Advantages

- » Patient and Care taker can be more satisfied by visualizing indicators.
- » Low cost system, Easy Installation, Zero Maintenance.

HOW OUR NURSE CALLING SYSTEM WORKS

Nurse Station Display Panel displays the room number of the calling patient. This panel can display 4 room numbers on one panel, so depending upon the total number of bed; we can have that many display panels.

- » Multi – Colored LED allow Nurses to identify the call type and address it accordingly. Any patient call is registered Highlighted until the patient is attended to.
- » Glass finished Multi- Color Door indicators help indentify room with Call pending, Nurse presence & Emergency.

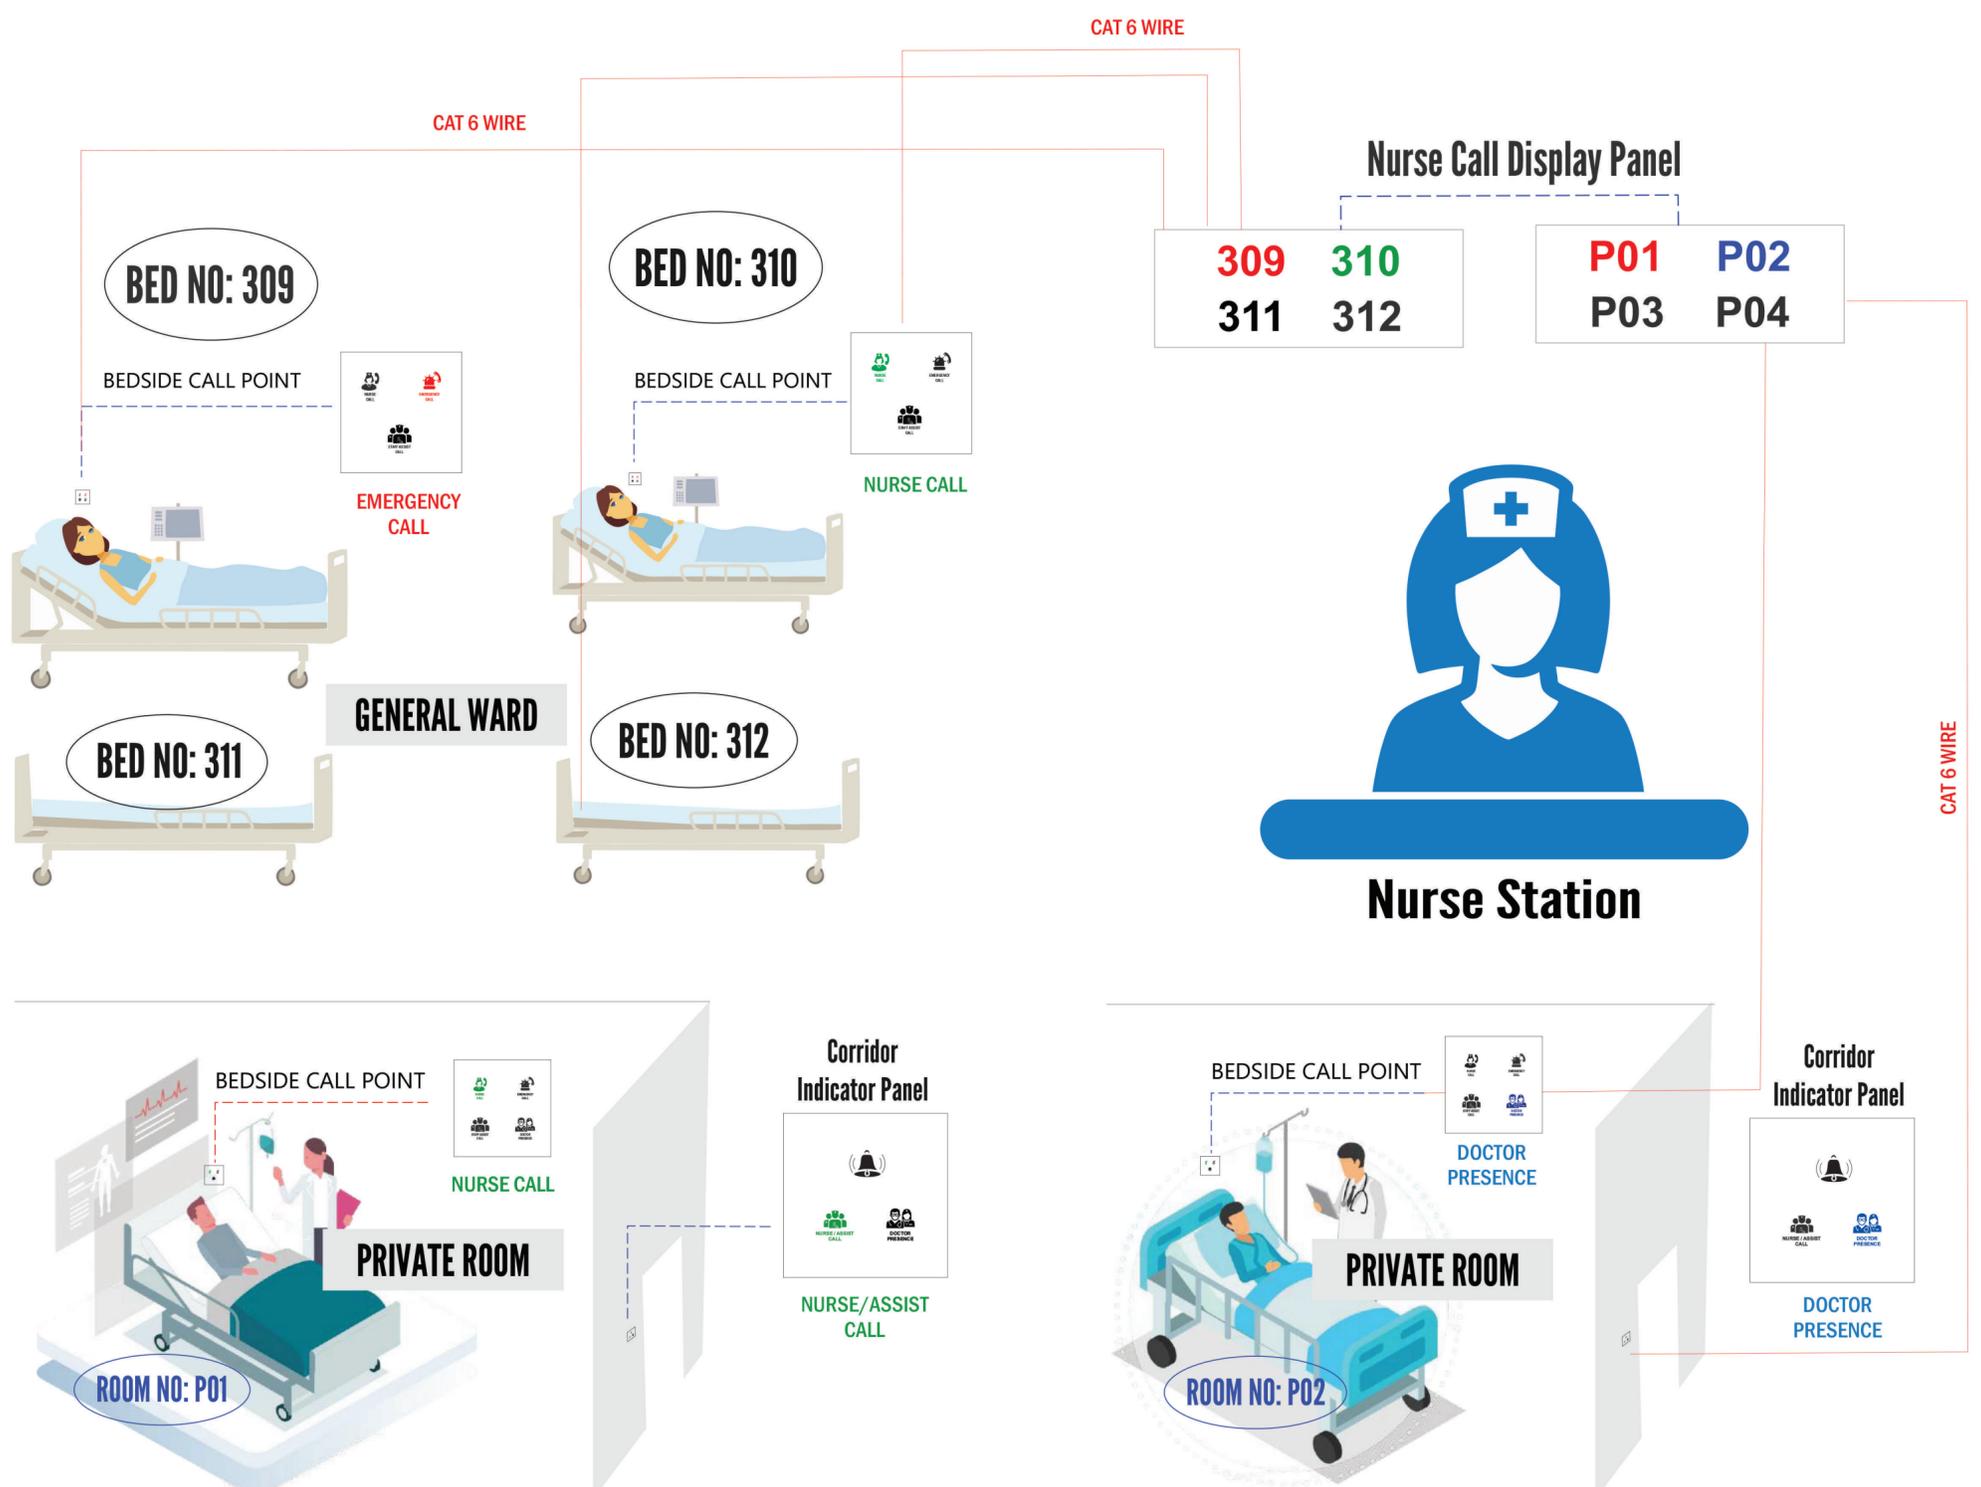

NURSE CALLING SYSTEM FLOW

Bedside Nurse Call Points: An accessible bedside call point unit is installed near the patient bed and the patient can press the Nurse call, Staff assists call & Emergency call options as per need.

Nurse Station Display Panel: Nurse Station Display Panel receives the call alert at the nurse station display and the respective bed with room number, the display panel will glow when the patient sends a call alert. Indicator color will depend on the type of care the patient needs for. A nurse will attend the patient accordingly. Attending nurse will activate the button once the patient is attended and well taken care of. The attending nurse then deactivates the call button on the Nurse call panel installed at patient bedside.

Room Corridor Indicator Panel: This panel indicates if the Doctor or Nurse is inside.
